

JD TECHNICAL SERVICES

Taking care of all your technology needs

[Learn More](#)

SERVICES

Technology

Technical specialists on staff to help you with any technology needs.

Advice

We provide expert advice on what you need to fix your problem or complete your project. We utilize simple and proven solutions that aren't overly complicated for your situation.

Purchasing

We can provide the hardware or software needed to complete your project or to repair/upgrade your systems. We only use the highest quality products that are purchased new, specifically for you.

Maintenance

Monitoring your systems is the key to having them available when you need them. We provide monitoring programs to verify that your anti-virus, data storage and backup systems are functioning and healthy.

ABOUT

We take care of all your technology needs

Our mission is to help residential and small business customers manage their technology. We realize that these customers require periodic help but don't have the personal expertise or on-site IT support to maintain their systems. We understand that technology is critical to everyone whether its for business or personal use. We'll take the time to explain your problem and explore potential solutions.

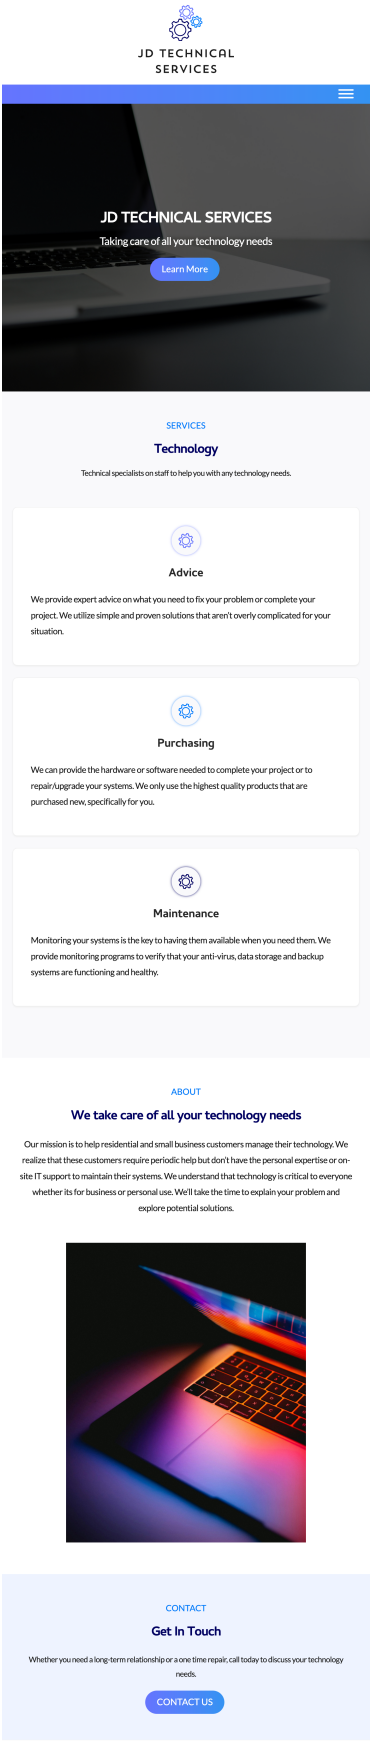

CONTACT

Get In Touch

Whether you need a long-term relationship or a one time repair, call today to discuss your technology needs.
